

VILLISTA CHIEFS REPORTED KILLED

EL PASO, Tex., March 23.—That the three Villista chiefs—Martin Lopez, Ramon Vega, and Epifacio Holquin—were killed with fifty-three other bandits in a battle with federal troops seventy-five miles south of Columbus, N. M., is the unconfirmed report circulated by Carransistas here. They stated the bodies were being taken to Juarez to prove the story.

BISHOP M'COY DIES IN BIRMINGHAM

BIRMINGHAM, Ala., March 22.—Bishop J. H. McCoy, Methodist Episcopal Church South, is dead here after an illness of several weeks. He was a resident of Birmingham. Cancer of the stomach is said to have caused his death.

WON'T CUT STEEL INDUSTRY WAGES

Wages will not be reduced in the steel industry although manufacturers have agreed to lower prices, the Department of Labor announces. The industrial board, Department of Commerce, has provided in its agreement with the "steel kings" that the present wage rates or agreements will not be interfered with. This will be the policy in general, it was pointed out.

"The prices that have now been fixed will continue in force for a long time," Roger Babson, Department of Labor, declared, "and no reduction in wages need be looked for."

Builders and contractors who use structural steel in their work will only delay the building boom, it was said, if they continue to hold off, hoping for lower wages.

Workmen are consumers, and for the manufacturer or builder to sell his goods he must pay sufficient wages to allow the worker to buy his products, is the argument used to maintain wages at their present scale.

STRIVING TO AVERT BIG BRITISH STRIKE

LONDON, March 22.—There is danger of a strike, but every avenue to secure peace is being explored, said J. H. Thomas in discussing the possibility of a strike of miners, transport workers, and railway men. Mr. Thomas is the head of the railway men's union.

The British workers are so closely bound up with the coal miners and the transport workers in their demands that the three unions are now known as British labor's "triple alliance." The demands made by this triumvirate are virtually the same.

BOLSHEVIKI DENY OFFENSIVE PLANS

NEW YORK, March 22.—Reports from German and neutral sources that Bolshevik forces are planning an offensive campaign, including an invasion, were denied today by L. C. A. Martens, who has been appointed representative of the Russian Soviet government in America.

BAKER CONFERS WITH MEXICANS CAUGHT ON CHARGE OF STEALING \$6,000

EL PASO, March 22.—Secretary of War Baker left here today for San Antonio, following an inspection of Fort Bliss and a round of military and civic ceremonies, in which the highest Carransistas in this vicinity took part.

The Secretary's party would not admit that his visit had the slightest connection with the Mexican problem.

A meeting between Baker, Mexican Consul General Garcia and Mayor Romero, of Juarez, at a banquet last night at Liberty Hall was extremely cordial.

DANVILLE, Va., March 22.—W. R. Dance, alleged to have stolen \$6,000 from the Danville Creamery, of which he was secretary and treasurer, was captured yesterday while attempting to escape from his father's home.

Dance recently signed a confession admitting defalcations, and then doctored his house and automobile over to the concern to make good his defalcation.

Authorities took action on learning the details.

LIPSEY & CO. FAILS.
CHICAGO, March 22.—Lipsy & Co., Inc., member of the Chicago Board of Trade, suspended business yesterday. Too liberal extension of credit to customers was given by those acquainted with the situation as the cause of the difficulty. The firm was capitalized at \$50,000.

BUTTERMILK A FOOD DRINK

A pleasant, refreshing beverage and a nourishing food combined in one product is found in buttermilk. It contains practically all the food materials of whole milk with the exception of the fat, most of which is removed in the process of churning. Buttermilk contains about 3 per cent of protein, nearly 5 per cent of carbohydrates in the form of milk sugar, 0.7 per cent of mineral constituents, and 0.5 per cent of fat. Thus a quart of buttermilk furnishes slightly more than an ounce of protein, one of the chief body builders.

The increasing consumption of buttermilk testifies to its popularity as a beverage. People are beginning to realize that it is much better to drink a glass of milk or buttermilk than it is to consume other drinks having little food value. Many physicians recommend buttermilk in the treatment of certain intestinal disorders, and it is also gaining in favor in hospitals.

Prepared buttermilk is usually made from skim milk and has all the chemical properties of buttermilk. If it is churned, as is usually the case, it agrees in appearance and flavor with real buttermilk. In fact, it is often a better product, especially if clean, sweet skim milk is used and it is carefully ripened and churned. Prepared buttermilk can be made in the city home, but more uniform results can be obtained when it is made on a large scale, and for that reason it is usually better to purchase it from a reliable dealer.
